DATA SHEET

The Optineo legs are available in three versions: Structurex® panel leg, Cantilever leg and Cantilever leg trimmed with a cover to form the equipped metal leg. Aluminium or anthracite epoxy finish.

The adjustable jacks on the legs allow adjustment so that the working top stays flat, to compensate for any defects in the floor. These desks are 72 cm high.

The tops have at least one elliptical cable port specific to the range, diameter 80 mm.

The structural modesty panels are made from 16 mm thick Structurex® with thin edging. They have two cut-outs at each end to feed cables from the desk to the optional horizontal cable channel.
