LINPAC ENVIRONMENTAL BEST VALUE IN LITTER PRODUCTS

Innovation and a relentless search for product improvement is the key to the success of LINPAC Environmental. Formed in 1994, LINPAC Environmental is today recognised as the leading manufacturer of plastic moulded street furniture and safety products. It is part of the LINPAC Group of Companies, which was established in 1959 and has grown to become one of the UK's largest manufacturing groups.

LINPAC Environmental is recognised as a leading provider of total concept environmental solutions and waste management products.

As a manufacturer, LINPAC Environmental has a distinct advantage over competitors who simply 'buy-in' products. Consistent quality, reliability and accountability can be ensured at every stage of the manufacturing process, giving our customers total peace of mind.

LINPAC Plastics Recycling, a sister company of LINPAC Environmental, is the UK's largest re-processor of post consumer waste plastics. Because of this association, many LINPAC Environmental products are made using an element of recycled material; the percentage used will vary according to the product type and colour.

At LINPAC Environmental we pride ourselves on offering the highest levels of service. From initial enquiry through to product delivery and beyond, our customer service team is on hand to help and advise customers.

Further information is available from LINPAC Environmental Customer Services, telephone 01225 816500.

LINPAC

HERITAGE

LITTER BIN RANGE

These elegant, aesthetically styled litter bins combine first rate functionality with a timeless and stylish appearance. Heritage bins are equipped with a 100 litre zinc coated steel liner or an optional plastic moulded liner. They are part of the coordinated Heritage range of traditional litter bins and bollards, with their appearance being enhanced by a gold band trim included as standard.

- The square Heritage has tough "double skin" moulded construction which ensures a long and trouble free life.
- Ground fixing kit available on all versions that will eliminate aggravation associated with extra parts during installation.
- Round and open top versions have integral ballast cartridge.
- Vandal resistant locks to ensure the security of the bin.
- Moulded through litter aperture with integral litter shute that direct litter straight into the liner, avoiding trapped waste between the liner and the inside of the bin body.

CASE STUDY

Joseph Matthai- London Borough of Barnet

"We preferred the LINPAC Round Heritage Hooded Litter Bin due to its design, construction and 100 litre capacity. Local traders are pleased with the uniform stylish appearance and happy because the bins have contributed to the overall cleanliness of our streets and shopping areas."

HERITAGE ROUND HOODED

Popular uses Conservation and heritage areas requiring street furniture with a traditional appearance. **Material** UV stabilised medium density moulded polyethylene (MDPE). **Colour range** Choose from a range of heritage LINPAC Environmental colours. Other colours made to order.

1. Key locking facility.
2. Top lifts off at ergonomic lifting height.
3. Generous 100 litre capacity liner.
4. Stubber plate available.

HERITAGE OPEN TOP

Popular uses Conservation and heritage areas requiring street furniture with a traditional appearance. **Material** UV stabilised medium density moulded polyethylene (MDPE). **Colour range** Choose from a range of heritage LINPAC Environmental colours. Other colours made to order.

LINPAC **PIONEER** LITTER BIN

This new high performance plastic moulded litter bin combines modern styling, generous capacity and functionality in equal measure. With double skin moulding for extra strength and front opening functionality, this innovation from LINPAC Environmental really is the future of litter collection.

- Generous 130L capacity which allows for less frequent emptying in busy areas.
- A super tough double skin construction leads to exceptional strength and longevity in even the most demanding of environments.
- Stubber plate fitted as standard or optional easy empty ashtray.
- An easy to operate front opening design which means that the liner can be removed without lifting it out of the bin.
- A hidden and innovative slam locking system for added security and ease of emptying.
- A dimpled exterior to increase resistance to fly posting.
- Unique 4 point locking system.

CASE STUDY

Stevyn Ricketts
Head of Contracts & Amenities
Gosport Borough Council

"The Pioneer bin provided us with a perfect solution to the need for robust, but stylish litter collection in the most demanding urban locations. Its strength and unique features were a huge selling point, with the added bonus that these bins are maintenance free, unlike metal equivalent products."

PIONEER BIN

Popular uses Ideal for high street and other demanding urban areas. **Material** UV stabilised medium density moulded polyethylene (MDPE). **Colour range** Choose from a range of modern LINPAC Environmental colours. Other colours made to order.

1. Insert key in recess and push home to disengage the latch.
2. Place hand in recess, lift then pivot open.
3. Door will remain open, remove key.
4. To lock, push door shut. The door will drop to reset position and latch will engage automatically.

PERSONALISATION OPTIONS

At LINPAC Environmental, we recognise the requirement for personalisation. Organisations and Local Authorities may wish to have special colours or the addition of logos, emblems or campaign messages. Our personalisation service can include accurate colour visual to your brief, giving you the opportunity to see the end result before purchase. This service has proved very popular and has been used by hundreds of customers to

create their own unique look. Our in-house specialist designers will prepare visuals and recommend branding solutions to meet your individual requirements. For further information about this service call us on 01225 816500 or email envinfo@linpac.com

MATERIALS

Durability Moulded polyethylene (PE) is extremely durable with outstanding impact, fracture and shatter resistance properties. These mechanical properties are tested to BS 2782.

Maintenance Free The solid body colour is permanently moulded-in, eliminating the need for maintenance painting. Units are wear resistant, scratches and parking nudges are less evident.

Chemical Resistance The material is resistant to most acids, salts and solvents. Environmental elements such as acid rain, soot, diesel fumes, salt and seawater will not corrode PE.

Manufacturing Standard (as applicable) All LINPAC Environmental products are manufactured to BS EN ISO 9002. Plastic materials: Mechanical properties tested to BS 2782 Hot dipped galvanised: BS 729 Powder coating: BS 3900 Zinc coating: BS 1706

Cleaning Products should be flushed with clean water and then washed with a mild detergent solution using bristle brush or sponge. Care should be taken not to apply undue pressure that may damage labels. Flush clean with water after washing.

Colour Specification Colours are available in those illustrated in the Colour Specification section of this brochure. Other non-standard colours and colour requirements may be available on request, please ask for details.

Weather Stability PE is ideal for external applications. Materials used are UV stabilised to meet the demands of Northern Hemisphere weather conditions.

Recycling Polyethylene (PE) is environmentally friendly material and is 100% recyclable. LINPAC Environmental products can be manufactured using recycled materials where appropriate.

OTHER LINPAC ENVIRONMENTAL PRODUCTS

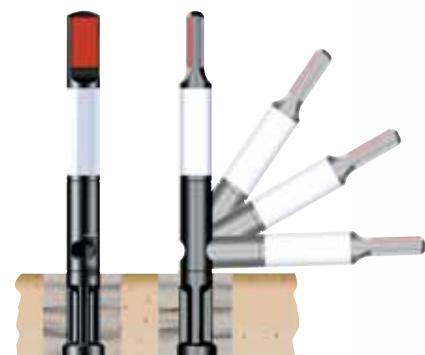

Retail

LINPAC Environmental offers a full product range specific to the Retail sector and is responsible for providing solutions to a wide variety of high profile organisations.

Bollards

Road safety is another primary concern for LINPAC Environmental. As bollard and low level signage manufacturers, the business provides a full and comprehensive range that is essential to safety on roads throughout Europe.

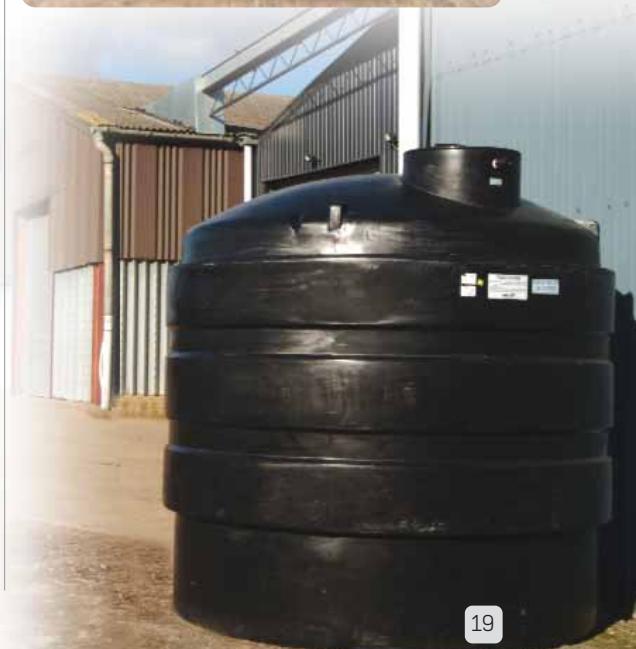

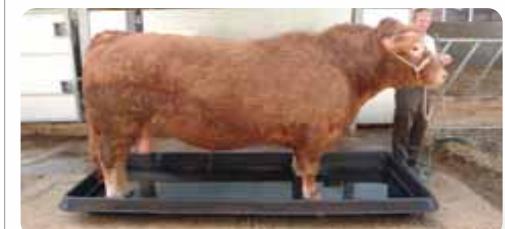

Recycling

Recycling is a primary concern of any environmental organisation. With a full range of internal and external recycling products, LINPAC Environmental offer methods of cost reduction, while protecting the environment.

Paxton

As a brand of LINPAC Environmental, Paxton is recognised as the market leader in the design, development and manufacture of plastic water storage tanks and agricultural products.
