

CONVIVIALE® COMMUTING

→ CONVIVIALE® BUS SHELTER

Thanks to its elegance and modular assembly, the CONVIVIALE® bus shelter can be adapted for any site and ensures that the laws governing highway access are adhered to. The CONVIVIALE® bus shelter allows total control over:

Options in size:

- > Standard Version: 3000mm.
- > 1000mm extension modules to enable you to adapt the size of the bus shelter to the length required.
- > Mini-Version: 1000mm for areas where there are fewer users – comprises all of the qualities and options of the Standard Version.

Options in advertising space:

- > *With a double-sided light box:*
is free standing and may be placed right angles to the shelter or in parallel.
Display size: height 1710 x 1160mm.
Rapid & easy poster changing.
Glazing can easily be replaced in the event of breakage.
- > *With the 2000 display pane (not illuminated):*
Integrated into the shelter.
Display size: height 1750 x 1200mm.

Options in seating:

- > Bench seat.
- > Perch seat.

Options in weather protection:

- > side cladding panels.
- > Wind and snow guards.

Options for safety at night:

- > Internal lighting of the bus shelter by LED.
- > Electricity supply from a photovoltaic panel.

In its standard version the CONVIVIALE® bus shelter has a small footprint and restricts to a minimum the space it takes up on the pavement, thus preventing an obstruction for pedestrians.

→ BUS-STOP POLE

When there is insufficient space to install a bus shelter, a bus-stop pole is an ideal and attractive means of marking clearly the location of a bus-stop and providing users with information on the bus timetables.

- > **Length:** 400mm.
- > **Height** above ground: 2055mm (not including the signage).
- > **Frame:** 40 x 40mm steel tubing, elegantly curved.
- > **Single-sided** poster case included, capacity for three 3 A4 displays, two locks, anodised aluminium frame, thickness 30mm, 4mm plexiglas glazing.
- > Blank signage panel in galvanised sheet steel, useable surface 360 x 360 x 3mm, lacquered finish in RAL 9006.
- > **Finish:** zinc-plated – see the palette on page 2.
- > **Concrete** directly into the ground.

→ TECHNICAL CHARACTERISTICS

The Standard CONVIVIALE® - is comprised of 3 modules of 1000mm in length, giving a total of 3000mm, 3 rear glass-panels, a timetable case and a bus-stop sign.

- > Extension modules of 1000mm*.
- > Total depth: 1500 mm.
- > Depth of roof coverage: 1400mm.
- > 100 x 60mm steel tubing posts.
- > Rear panelling: Securit® 8 mm safety glass**.
- > 40 x 40mm steel tubing roof.
- > Galvanised sheet steel roof support, thickness 5mm.
- > Roof of tinted UV treated 6mm PMMA.
- > A timetable case 750 x 750 x 30mm, anodised aluminium; capacity: 6 x A4.
- > Bus-stop sign, height 160 x 900mm, lacquered with our RAL 9006 colours.
- > Bench and perched seating optional***.
- > Finish:
 - Structure: painted, galvanised finish.
 - Roof frame: zinc-plated.
 - Colour: see swatch on page 2.
- > Concrete directly into the ground.

The CONVIVIALE® Mini bus-stop consists of a single module of 1000mm in length, rear glass panelling, a timetable case and a bus-stop sign.

**The size of the shelter must be decided prior to placing an order. Procity advises against retro-fitting of extension.*

***Polycarbonate or perforated steel rear cladding available.*

****Do not install the bench or perch seat next to the light box or the 2000 poster case as this will prevent them from being opened.*
