

## Self Leveling Spring Lift Trolleys

Self-leveling units are ideally located in situations that require a worker to be bending and lifting in their work place. By using a self leveling unit the possibilities of a worker injuring their back are greatly reduced.

The pantograph works by a scissor and spring system that is set at a pre-calculated rate. Each time an object is placed on the table top it lowers a little, leaving the item at a reachable height. The reverse happens when removing objects from the unit, each time an object is removed the table top rises, ensuring the items are always at the top of the unit to ease back problems in the workplace.

Please feel free to call to discuss your project / requirements.

Sizes listed below are just for the unit and do not allow for the 125 mm castors which add approximately 150 mm to the overall height.

Contact Merlin for more information. Current lead times are 8 to 10 weeks.

<b>MODEL</b>	<b>SIZE mm W x D x H</b>	<b>NOTES</b>
<b>CLM125</b>	585 x 430 x 560	STANDARD
<b>CLM081</b>	610 x 610 x 610	STANDARD
<b>CLM268</b>	840 x 915 x 785 - 1270	HIGH BACK
<b>CLM215</b>	865 x 430 x 700	STANDARD
<b>CLM269</b>	890 x 610 660	STANDARD
<b>CLM254</b>	915 x 610 x 510 - 1300	HIGH BACK
<b>CLM146</b>	1015 x 710 x 635	STANDARD
<b>CLM130</b>	1115 x 710 x 710	STANDARD
<b>CLM127</b>	1220 x 610 x 810	STANDARD
<b>CLM217A</b>	1220 x 915 x 810	STANDARD
<b>CLM153</b>	1220 x 915 x 635 - 1245	HIGH BACK
<b>CLM237</b>	1370 x 710 x 685	STANDARD
<b>CLM162</b>	1450 x 915 x 735	STANDARD
