

About Education

From day one, Rhubarb Solutions have had a major interest in providing seating solutions for our next generation.

Our education ranges both promote the collaborative ethos and culture of 21st century learning environments and ensure that the seating provides correct musculoskeletal support for young frames. And we inject some fun too whilst delivering exciting solutions and creating a high visual impact.

We have seating for everyone, from first steps in the nursery setting right through to students in college and universities. The needs of front line and support staff are also fully serviced as are any requirements for technical seating.

The Education range comes fully supported by our 6 year warranty*.

Environments

- Teaching and learning zones
- Library and breakout zones
