

About Kolbak

Kolbak is a comfortable and completely modular range, designed for maximum flexibility. With both high and low back options available and a range of straight and curved units, Kolbak can create private zones or open seating areas allowing third space and breakout areas to truly deliver on their potential.

As with all our soft seating, Kolbak is hand made at our factory in Thame by skilled craftsmen. Seats are traditionally made using solid FSC timber frames with webbing to provide not only a comfortable sit but a product that will last.

Pod solutions enable the use of integrated LCD / LED screens as well as power and data. A central table provides meeting space for IT equipment or just a coffee.

Environments

- Reception areas
- 3rd space interiors
- Library and breakout zones
- Informal rest areas
- Education
- Healthcare

Technical Data

- FSC compliant timber core
- Sprung traditional webbed seat
- Fully modular
- Pod solutions
- High or low back
- Straight and curved units
- Chrome or wood legs
- Optional bespoke fluting on fabric
- Power / data solutions
- LED / LCD screen compatible (POD)
- CAD blocks available to support layout configurations
