

About Negus

Negus offers modern style and superb comfort. Its real USP is a full suspension back membrane which provides both support and flexibility by enabling lateral movement as well as the traditional lumbar support.

The synchro mechanism has a side-mounted tension adjustment which, unlike many under-seat adjusters, is easy to reach from the seated position.

Negus is available with a mesh back or fully upholstered in a wide range of fabrics or leather.

Negus is also available as a visitor chair on a cantilever frame.

Environments

- Office
- All environments requiring task-based seating
- Meeting and training zones
