

## About Prima

Prima is a chair we are truly proud of. It combines clean contemporary style with a strength and durability that is hard to beat and is available in a wide variety of formats to suit different uses and environments.

For offices, meeting rooms, training settings, eating areas, the 4-leg and cantilever Prima chairs come upholstered, supplied with wooden seat and back sets, or are available with a polypropylene seat and back.

The chair features a self-linking system enabling it to be used as an alternative to beam seating where flexibility is required. And for public spaces, Prima can be beam mounted with either a fixed or a tip-up seat.

For university, school or training environments, Prima chairs have a writing tablet option (with which they still stack vertically with the tablet in place) and under-seat baskets and with the addition of castors Prima becomes the perfect collaborative learning seat.

## Environments

- University & College lecture and training zones
- Corporate meeting and training areas
- Dining areas
- Hospital waiting zones, including A&E
- Conference facilities
- Public spaces
