

## About Quantum II

Quantum II is part of our next generation of task seat, upholding the ethos of Rhubarb Solutions to design and manufacture seating that properly supports the human frame.

The wide Thorax back offers concentrated support from the neck to the abdomen. A super strong spider base is matched to a new heavy duty under-seat mechanism that has extra wide clutch plates allowing a 'squeak' free performance over the entire life of the product.

The large seat and deep CMHR foam ensure a comfortable sit for prolonged periods and the independently height adjustable back enables the support to be positioned to suit most user heights.

## Environments

- Task based office environments
- Meeting and training zones
- Dimensions
  - Height: 965-1035mm
  - Width: 510mm
  - Depth: 470mm
  - Seat Height: 460-600mm
  - Overall footprint: 670mm square
- Wide thorax back
- BSE (tested to 150kg)
- Heavy duty mechanism
- Easy lift height adjustable back
- Optional seat slider
- Optional inflatable lumbar
- Optional synchro mechanism
- Optional height adjustable arms
- Optional draftsman's kits
