

About Trike

Learning methods, tools and environments are rapidly changing. Today's students and teachers want active learning settings that support collaborative learning and provide for immediate mobility and flexibility.

Trike is both mobile and flexible. It's designed for quick, easy transitions between room configurations and teaching styles. With Trike a classroom can transform in seconds from 'chalk and talk' teaching to group work.

Trike also provides an answer to the space constraint of a fixed classroom footprint - replacing the fixed desk worktop with a tablet mounted on a mobile chair enables far more efficient use of available areas.

Environments

- Teaching and learning zones
- Training facilities
- Computer/ IT suites
- Laboratories

Technical Data

- Dimensions
 - Height: 890mm
 - Width: 580mm
 - Depth: 600mm
