

About Yera The Ergonomic Superstar

This task chair satisfies every requirement of ergonomic design. The mesh back membrane features upper and lower areas that are firm, with a closed cell structure, while the middle section has a more open, soft-cell structure allowing the back support to fit and adjust to each user's back shape.

The 3D seat foam detects where seat pressure is applied and spreads the load evenly within the 3D core thereby reducing pressure on the thigh and providing enhanced comfort throughout the working day.

User fatigue is a common complaint when sitting for prolonged periods and this can cause musculoskeletal issues. Yera addresses this with a smooth easy flow 20 degree reclining back, which is linked to an independent seat slider that further reduces pressure on the thigh region.

Environments

- Office and commercial environments
- Meeting and training areas

Technical Data

- Dimensions
 - Overall height: 960-1170mm
 - Width: 480mm
 - Depth: 480mm
 - Seat Height: 450-560mm
 - Overall footprint: 650mm square
- Mesh back with zoned membrane
- Independent lumbar adjustment
- Reclining back mechanism with 20 degree rake
- Side mounted tension adjustment
- Syncromesh movement
- Seat slider
- Height adjustable arms
- 3D responsive seat foam
- Optional headrest
