

Flight Cases

Our tough and rugged flight cases provide on the road protection for your valuable equipment. We offer both off the shelf and bespoke flight cases which can be designed and custom built to your exact specification. A diverse range of accessories and features can be incorporated within the designs such as doors, hatches, lift out trays, pull out drawers, rack mount fittings, castors or even an electronic lift system for lifting a plasma screen out of the case.

We are the UK's leading manufacturer of bespoke flight cases. All of our flight cases are manufactured in our UK factory.

Trifibre custom designed flight cases have been used all over the world to transport and protect some of the most precious items in a wide range of industries and clients including Johnson & Johnson, Samsung, Fender, McLaren and Airbus.

Poly Cases

Poly cases are the ideal, stronger alternative to cardboard boxes, and a more cost effective solution than our flight cases. Tough, durable and splash proof, they are constructed from HDPE, and can be custom made to fit your individual specification. Poly cases are constructed with a welded steel metal frame around the top to give it a more rigid structure, and a variety of handles, shoulder straps, lid retainers, foam linings, custom made foam inserts and wheels can be utilised - the options are endless!

Our in house silk screen printing department allows us to offer corporate branding to your case.

Poly Cases are ideally suited for light and medium duty applications.

Aluminium Cases

We offer a range of aluminium cases; everything from off-the-shelf aluminium briefcases and boxes, to made to measure aluminium cases, designed and built around your equipment to your exact specification.

Aluminium cases can be fitted with integrated electronics.
