

K470 universal container –

Quality in every detail

The original since 1950

Top quality is always a question of detail. And that explains perfectly why our universal containers are not only market leaders, but also leaders in quality.

Superiority begins with the details

- 1 Lid with foamed seal all round**
Protected against wear, overloading and squashing

- 2 Sealing function** also included in corner areas

- 3 Stainless steel hinge strips** riveted into the sheet metal jacket and lid full-profile section (protection against tearing out)

- 4 Stacking corners** made from durable cast aluminium

- 5 Two heavy-duty lid holding straps**
Sealed at the ends to prevent fraying. Will not be torn out under heavy loads. Attached with special rivets (with extra-large heads)

- 6 Wider hand rest for more ergonomic design**
Wider and thicker gripping surfaces mean that the cases are even easier to handle and can be carried for longer periods without tiring

- 7 All riveted joints** with full rivets

- 8** Depending on size, **beading all round and corner beads** for added stability

Note:

The K 470 universal container is available in 25 standard sizes

- 9 Skid bars** made from sturdy aluminium sections on cases from outside dimensions 1,200 mm x 800 mm (additional reinforcement)

- 10 Edge, base, lid profile-section frame** made from full profile sections, joint fully welded to sheet metal with permanent bonding through high-strength positive locking

Tailored to your needs – more variety in Comfort fasteners

The ZARGES Comfort fasteners can be equipped with a mortise lock or with spring anti-opening feature. They can also be secured with a shackle lock or lead seal.

Ergonomically shaped, extra-wide ZARGES Comfort handles

Durable ZARGES Comfort fastener

Perfect handling, even when wearing gloves

With 25 sizes, the K 470 series offers a unique selection of standard dimensions. Their capacity ranges from 13 l to 829 l.

And if you do not find the right case for your needs in this range, ZARGES also offers individually designed special sizes.

- High-quality aluminium universal box
- Lid with stainless steel hinge strip, two belt straps and foamed seal all round
- Cast aluminium stacking corners
- High level of stability due to 3 fully-welded aluminium profile frames
- Profile-section joints fully welded
- Beading all round and corner beads for additional dimensional stability
- Extra thick 1.5-mm sheet metal for all K470 containers from basic dimensions 750 mm × 550 mm
- Ergonomic heavy-duty sprung drop handles
- ZARGES Comfort handles for ergonomic handling and loads of up to 50 kg
- Ergonomically designed and durable Comfort fasteners for at least 20,000 operating cycles
- Snap fasteners: can be secured with a plug lock, lead seals, spring anti-opening feature or a padlock (max. shackle thickness 6 mm)
- 25 standard sizes, customised sizes on request

Individual foam inserts – made to measure

We manufacture tailor-made foam inserts in a large range of materials to provide perfect protection and functionality geared specifically to the goods you are transporting

You supply photos, drawings, 3D-data or original parts – and our designers develop the perfect inserts for your specific application

You have a choice of various colours

Antistatic, dissipative or flame-retardant designs available

Another special characteristic of these first-class foam materials is that the protective effect of the finished packaging can be calculated in advance

Based on weight, surface, drop height and sensitivity (G-value), we can develop for you packaging with optimally adapted padding thickness

The result: lowest possible raw material requirements with maximum protection

Individual design

Use of 3D-data facilitates the design project

Foam inserts that fit perfectly
