

Matrix Bench

desking, storage and screens

Delivery & installation included

Rectangular workstations offer a traditional workspace available in several widths and two depth options, 800d & 600d.

Meeting Extensions are compatible with Double Bench Workstations. There are two widths available when specifying on Double Benches with screens and without screens. The meeting extension is supported by brackets to ensure maximum strength and stability without the use of a visible support leg.

Double Bench workstations offer clean lines and symmetry with the use of vertical leg frame uprights. Double modules share components reducing the number of legs required. This also increases the movement for the user under the workstations via a recessed shared leg frame between adjoining modules. Optional horizontal and vertical wire management is available and a choice of screen panels. Matrix Bench is available in three paint finishes for the desk metalwork and system screen trim, Silver RAL9006 is standard and White RAL9003 & Black RAL9005 are an optional extra.

Complimentary conference and meeting tables form part of the portfolio.
