

Space Saving Office Recycling Bin

The popular **110 Ltr Meridian Envirobin** has been developed together with The University of Greenwich, its clever design allows for a huge 110 Litre capacity yet its narrow foot print allows it to fit comfortably into office environments. The bin was designed to champion the **sustainable journey to zero waste**, with its interchangeable lid system making it flexible to suit wide range of recycling collection plans.

The range is available in either a 70/30% split allowing for a dual collection or a 30/40/30% split providing a triple collection option or a full 100% open aperture. The bin is so popular we have now launched a smaller version.
