

Merlin Industrial Products Ltd is proud to launch yet another unique and innovative product, the patent pending Pedestrian Tunnel. This fantastic new product performs the important task of protecting people safely from accidental falling debris, tools or materials from height.

It's unique design enables the Pedestrian Tunnel to be erected and installed fast and efficiently by a single person on site. The Pedestrian Tunnel has the addition of a precise anchorage system allowing units to be connected together creating a complete run of protection for the passing public while contractors work on buildings at height.

Key Features and Technical Details

- Size: 2150mm x 1780mm – 2280mm x 1140mm
- Weight: 31kg
- Material: Aluminium
- Wind resistance: 120km/h
- Impact resistance: 5kg from 25m
- Unique telescopic and folding legs
- Single person installation and assembly
- Stackable for storage and transport

All four aluminium telescopic legs have a patented device within its design, this allows them to quickly and accurately unfold and lock into position. The Pedestrian Tunnel is then ready to use and help protect people from falling objects.
