

# Spring Lift Trolleys

Supplied by  
Merlin Industrial Products Ltd  
sales@merlinindustrial.uk

Our Spring Lift Trolleys maintain a constant loading / unloading level to allow the operator to work in an upright position thereby reducing the risk of back strain and associated injuries. These trolleys have easy to adjust load spring mechanisms for lighter/heavier load capacities. As standard the trolleys are mounted on a heavy duty 25mm galvanised box section chassis.

**A Loading**

**B Unloading**

Castor wheels are available in diamond or 4 corner formations.

4 Corner Formation

Diamond Formation

SLT04

## Features

- Tension adjustable spring lift mechanism
- Excellent maneuverability
- All trolley parts are fully serviceable
- Options: colour coding, castor types and sizes, castor configurations

## Advantages

- Elevates contents to appropriate height
- Easy loading/unloading for operators
- Speeds up processing of workload
- Voids in base allow easy access cleaning
